

Exercise 1

Store two input-output associations in the associative net. Present one of the stored input patterns and check if the correct output pattern is recalled.

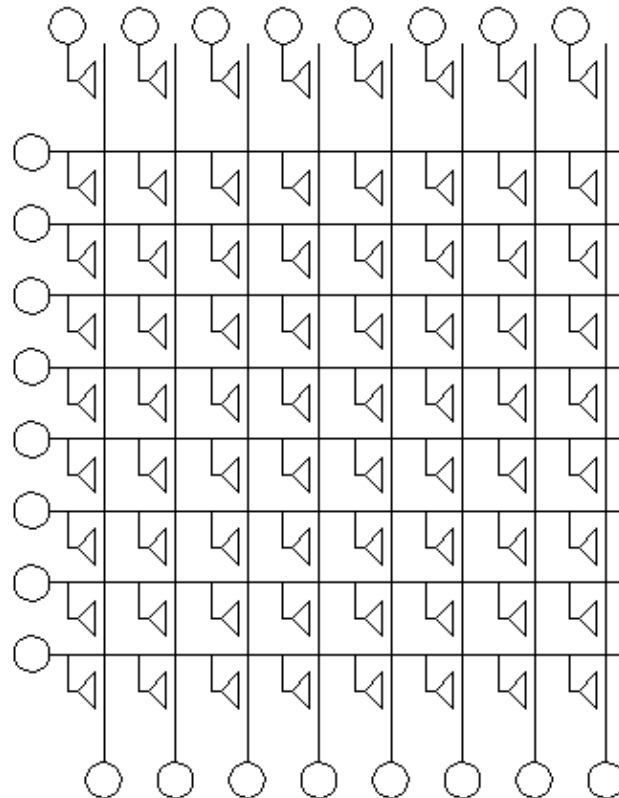

Suggested associations: $\text{input}_1 = (01001001)$, $\text{output}_1 = (11000001)$; $\text{input}_2 = (10101000)$, $\text{output}_2 = (01011000)$. Test with input_1 .

Exercise 2

Store two other associations. Present the stored input pattern from the previous exercise again and check if the correct output pattern is recalled.

Suggested associations: $\text{input}_1 = (01001001)$, $\text{output}_1 = (11000001)$;
 $\text{input}_2 = (10101000)$, $\text{output}_2 = (01011000)$; $\text{input}_3 = (00010011)$, $\text{output}_3 = (00101010)$;
 $\text{input}_4 = (11000100)$, $\text{output}_4 = (01001100)$. Test with input_1 .

Exercise 3

Store two input-output associations in the partially connected associative net below. Present one of the stored input patterns and check if the correct output pattern is recalled. Suggested associations: $\text{input}_1 = (01001001)$, $\text{output}_1 = (11000001)$; $\text{input}_2 = (10101000)$, $\text{output}_2 = (01011000)$. Test with input_1 .
